- A) Dementia
- B) Delirium
- C)Schizophrenia
- D)Epilepsy
- E) Bipolar disorder

Answer: Delirium

25-one of the following is true: ***

- a) Sexual identity is the self-identification of gender.
- b) Gender Identity is the Biologic identification of gender.
- C)Gender identity usually develops by age 3 (36 months)

Answer: Gender Identity develops by age 3

26-what is the most appropriate statement to describe Delusion:

- a) False belief amenable to reasoning
- b) Thought content disorder.
- c) Misinterpretation of external stimuli

Answer: B.Thought content disorder

27-All of the following is true except:

Answer: stigmatization for psychiatric illnesses occur in developing countries only

28-Depersonalization is:

Answer: Feeling of unreal self

29-All of the following occurs in Narcolepsy except:

- a) Cataplexy
- b) Sleep paralysis
- c) Partial seizures

Answer: C) Partial seizures (Does not occur in narcolepsy)

30-one of the following is cluster A personality disorders:

Schizoid

31-Wrong about dementia:

fluctuations of concentration

32-Wrong about insomnia:

2 episodes per month for diagnosis

33-Most potent on D2:

Haloperidol

34-One of the following regarding suicide is wrong:

- a) It's the 3rd leading cause of death.
- b) Mild dementia is a risk factor.

Answer: A

35-Indication for admission bipolar patient:

not eat or drink

36-All of the following is true except:

stigmatization for psychiatric illnesses occur in developing countries only.

37-One of the following drugs cause seizures if withdrawn:

Diazepam

38- When giving lithium for treatment you would do what test:

- a) Serum cortisol
- b) Serum creatinine

c)EEG

Answer) Serum creatinine ** (follow up when taking lithium)

- a) Fearing of strangers in open places
- b) Fearing of negative evaluation **

Answer: B

40- indication for hospitalization (in bipolar):

a pt. who is not eating or drinking.

41- Wrong about ECT:

it's always a 2nd line of treatment.

42- Not given to an elderly with dementia:

TCA

43- What's wrong:

kleptomania is criminal behavior.

44- Risk of schizophrenia in fetus with a pregnant woman?

Answer :12%

45- What is depersonalization:

Feeling of unreal self

46- What is affect: **elicited by the doctor.**

Objective assessment

47- Not associated with narcolepsy?

Night seizures

48- A pts came to the doctor with depression, he was given an antidepressant then a few weeks later he came again with euphoria, agitation (can't remember exactly but they are symptoms of mania) what's the diagnosis?

Bipolar

49- A 65-year-old women appeared to be confused at the ER. She has been prescribed benzodiazepines. This is her first episode what's this.

- a) Dementia

b) Delirium

Answer: B

50- A manifestation on Neuroleptic Malignant Syndrome:

Leukocytosis

51- A patient is known to drink alcohol and have had high levels in his blood. His drinking led to family problems. When they cut his drinking, he had no withdrawal symptoms what this is called:

- a) Alcohol dependence
- b) Alcohol abuse
- c)Alcohol intoxication

Answer: B

52- Delusion:

false fixed thought

53- Social phobia:

fear of negative evaluation

54- About schizophrenia:

it common in winter

55- What drug causes dryness of mouth:

Imipramine (TCA)

56- For lifetime treatment of bipolar depression we use:

- a) Valproate **
- b) TCA
- c) SSRI
- d) Combination of B and C

Answer: A

57- Drug that does not use in Alzheimer disease

TCA

58- Not a side effect of an antipsychotics:

hypotonia

59- A patient has been hearing voices talking about him over the last three weeks and he can't see them, which psychopathology:

Answer: Disorders of Perception.

60- A patient when asked about his level of education, talked about his school, his friends and concluded by saying, " that was the end of my schooling". Which demonstrates his answer:

Answer: Circumstantiality

61- Increasing the amount of Heroin to achieve the same initial effect:

Answer: Tolerance

62- Occurs in REM sleep:

Answer: Loss of muscle tone

63- Which is antipsychotic:

Answer: Quetiapine

64- A student who is afraid to give seminars as he is sensitive to negative evaluation, most likely diagnosis is:

Answer: Social phobia

65- Definition of Delusions:

Answer: False belief that is held despite evidence of contrary

Answer: Perception

70- Gender identity is normally established at age:

Answer: 3 years (36 months)

71- True about psychotherapy:

Answer: it aims at improving client function

72- A behavior therapy technique:

Answer: modeling

73- Pyromania is:

Answer: Impulse to set fire

74- Characteristic of Paranoid personality disorder:

Answer: Mistrust

75- Sign to alert the physician about the possibility of alcohol dependence:

Answer: Peripheral neuropathy

76- Cause of reversible dementia:

Answer: Alcohol induced type

77- Drug causes highest mortality among users:

Answer: Heroin

78- Rate of transmitting schizophrenia to the offspring of a schizophrenia mother:

Answer: 12%

79- Which brain system is correlated in schizophrenia:

Answer: Dopaminergic system

80- question about the features of REM sleep:

Answer: Maximal loss of muscle tone

81- Associated with anorexia nervosa:

Answer: Amenorrhea

82- Most important in delirium management:

Answer: Searching for underlying cause

83- True depression:

Answer: Physical symptoms are common presentation

84- True about Doctor-Patient relationship:

Answer: Medical schools should nurture patient centered relationship

85- Recurrent short episodes of depression that was treated. Three weeks late the patient started having symptoms of mania, diagnosis:

Answer: Bipolar disorder

86- True about adjustment disorder:

Answer: Onset of symptoms within 3 months after trauma exposure

87- True about schizophrenia:

Answer: Dopamine over activity is thought to be the cause

88-A feature of REM sleep:

- a) decrease respiratory rate.
- b) decrease cerebral blood flow.
- c) dreams
- d) parasympathetic activation

***Answer: c) dreams**

89- testimonial capacity is:

- a) ability to testify in court.
- b) capacity to write a will.

Answer: B) capacity to write a will

90- indicate seriousness of suicide:

- a) using firearms
- b) writing a will
- c) angry for being saved.
- d) being a female

Answer: A&B both are correct, but according to the past B was the answer

91- Typical antipsychotic:

Answer haloperidol

92- first drug to give to extrapyramidal side effects:

A)olanzapine

B) diazepam

C) procyclidine

D)citalopram

E) lithium CO₃

*Answer is c) procyclidine

92- the disease caused by decrease serotonin:

a) depression

b) schizophrenia

Answer is A) depression.

93- hallucination best description:

Answer is perception without external stimulus.

94- used in alcohol dependence:

a) Olanzapine

b) Diazepam

Answer is B) diazepam.

95- general anxiety disorder is:

a) anxious in public

b) anxious about everyday events

Answer is b) anxious about everyday event.

96-social phobia is:

Fear of being embarrassed (fear of being criticized)

97- case about someone who fears public, crowded places:

Agoraphobia

98- bipolar prevalence:

1%

99- ADHD:

a) decrease dopamine.

b) decrease after the age of 15.

Answer A) decrease dopamine.

100- personality disorder wrong:

Begin at the age of 18.

101- reversible cause of dementia:

- a) Alzheimer disease
- b) pick's disease
- c) pseudodementia

Answer is c) pseudodementia.

102- allowed units of alcohol per week:

20

103- most common presentation of depression:

physical symptoms

104- not associated with narcolepsy:

Answer increased REM SLEEP

105- Gender identity:

36 months

106-side effect of SSRI's:

nausea

107- Drug that does not cause dependence:

olanzapine

108- which of the following is characteristic for unipolar depression:

Anhedonia

109- paranoid delusions are found in all of the following except:

- a) Depression
- b) Schizophrenia
- c) OCD
- d) Dementia
- e) Substance abuse

Answer) OCD * (Paranoid Delusions are not found in OCD)

110- Thought Echo is:

- a) A form of thought broadcasting
- b) Abnormal thought content
- c) An illusion
- d) Idea of reference
- e) A hallucinatory experience

Answer: A

111- which of the following drugs causes dryness of mouth the most:

- a) Risperidone
- b) Fluoxetine
- c) Chloropyramine

Answer Chloropyramine * (antihistamine)

112- which of the following statements is true regarding Dr-Pt relationship:

- A. It doesn't affect the course of the health problem.
- B. Med schools should nurture patient centered medicine.
- C. In the relationship the pt. has no active role to play
- D. Should concentrate on the disease not the patients' emotions.

Answer: B

113- unlikely feature of neuroleptic malignant syndrome

Leucopenia (true is leukocytosis)

114- which of the following disturbances is associated with highest risk of suicide

- a) Paranoid schizophrenia
- b) Dissociative disorder
- c) Major depression * (Bipolar is also high)
- d) Dementia

Answer: C Major depression * (Bipolar is also high)

115- all of the following are impulse control disorders except:"

conversion disorder (not impulse control disorder)

116- unconscious mechanisms play a role in all of the following except:

- a) Somatization
- b) Dissociative
- c) Hypochondriasis
- d) Munchausen syndrome
- e) Malingering

Answer: E

117- which of the following is a feature of schizoid personality

- a) Desire to mix with others.
- b) Anxiety
- c) Acceptance of abnormal traits
- d) Self-Importance
- e) Dependency

Answer: D

118- a pt. came to the ER saying that for the last few months he has been hearing voices talking to him, when he was asked if he was sure, he said 100%, this shows which psychopathology:

- a) Derealization
- b) Disorder of thought content
- c) Disorder of perception

Answer: C

119- diagnosis of all of the following occurs in childhood or adolescents except

- a) Separation anxiety
- b) Conduct disorder.
- c) ODD
- d) Personality disorder (only occurs after adulthood)

Answer: D

120- CBT effective in all except:

- a) Panic disorder
- b) PTSD
- c) Social anxiety
- d) Depression
- e) Antisocial PD

Answer: E

121- which of the following is associated with repeated overdose

- a) Munchausen syndrome
- b) OCD
- c) Paranoid personality disorder
- d) Borderline PD

Answer: D

122- which of the following drugs associated with highest mortality among users:

Heroin

123- which is true of depression:

- a) Physical symptoms are a common presentation.
- b) Affects 2% of the general population.
- c) 5% commit suicide

Answer: A

124- Depersonalization:

Feeling of unreal self

125- which of the following is a sign of seriousness in a suicidal attempt:

suicidal note

126- which of the following is true regarding bipolar disorder:

- a) Only presents in middle age.
- b) No genetic component
- c) Treated by lithium.

Answer C

127- which of the following is a reversible dementia

- a) Alzheimer's
- b) Picks disease
- c) CJD
- d) Alcohol induced.

Answer D

128- which of the following alerts the doctor for the possibility of alcohol dependence when examining a patient:

- a) High blood pressure
- b) Excessive cigarette smoking
- c) Peripheral neuropathy

Answer C

129- abnormality of which system mostly associated with schizophrenia

Dopaminergic

130- which is a sleep disorder

- a) Night Vision
- b) Panic disorder
- c) Cataplexy
- d) Kleinn Levin disorder
- e) Cautard syndrome

Answer D

131- which of the following is associated with anorexia nervosa

- a) Amenorrhea
- b) Normal body image
- c) Low blood pressure
- d) Body weight 20% above normal

Answer A

132- most imp in Delirium management:

- a) V fluids
- b) Search for the underlying cause
- c) Low light in the room

Answer B

133- a schizophrenic mother wants to get pregnant and asks about the possibility of having a schizophrenic child:
12% (risk of schizophrenic offspring for schizophrenic mother)

134- an example of behavioral therapy:

- a) Gestalt therapy
- b) Hypnosis
- c) Modeling
- d) Psychoanalysis

Answer C

135- which is true regarding psychotherapy:

- a) Has no significant effect on brain neurotransmitters
- b) Aims to improve client functioning.
- c) Not suitable for children below 12 yrs.

Answer B

136- characteristic for paranoid PD:

- a) Reckless behavior
- b) Magical thinking
- c) Mistrust

Answer C

137- characteristic of REM sleep

loss of muscle tone

138- patient RTA, wakes up later confused, agitated and thinks he is home:

Delirium

139- patient with depressive symptoms prescribed antidepressants, 3 weeks later presents with agitation, lack of sleep, (manic features), what did the doctor miss:

Bipolar disorder

140- increase suspicion to organic cause of acute psychosis:

- a) High blood pressure

- b) Peripheral neuropathy
- c) Confusion
- d) Auditory hallucination

Answer B

141- a pt. presents to the ER with Resp Depression, pinpoint pupils, and needle marks with Tattoo, most likely drug
Heroin

142- pyromania is:
an impulse to set fires.

143- gender identity is established at what ages?
36 months

144- A characteristic of Schizoid personality disorder:
a) importance
b) anxiety
c) accept abnormal traits.

Answer A

145- Subconscious mechanism one wrong:
a) Malingering
b) Dissociative
c) Somatization

Answer A

146- Persecutory Delusion not in:
a) Depression
b) OCD

Answer: b

147- increase suspicion of organic cause to acute psychosis:
a) High blood pressure
b) Confusion
c) Peripheral neuropathy
d) Auditory hallucination

Answer is c.

148- sleep disorder:
A-Liven due syndrome.
B-Cataplexy

Answer B

149- Thought echo:

A-Broadcasting thought

B-Auditory hallucination

Answer B

150- A characteristic of unipolar depression...

Low self-esteem.

151- One is a behavioral therapy technique...

Flooding

152- Persecutory delusions in all except...

OCD

153- Dr-Patient relationships; what is true...

Paternalistic relationship with the patient is unacceptable.

154- Which is not impulse disorder...

Conversion disorder.

155- All disorders have unconscious mechanisms except

- a) Münchhausen (we chose this,
- b) Somatization
- c) Hypochondriasis
- d) Dissociative Symptoms

Answer:A was chosen malingering was not a choice

156- Which disorder is associated with repeated drug overdose...

- a) Borderline
- b) Münchhausen
- c) Depression

ANSWER A

157- Cognitive behavioral therapy effective in all except...

- a) Panic disorder
- b) PTSD
- c) Depression
- d) Anxiety
- e) Paranoid schizophrenia

ANSWER E

158- Which of the following occurs in REM

- a) Night terrors

b) Enuresis

Night terrors and enuresis are not typically associated with REM sleep.

159- True about Schizoid personality...

Solitary behavior.

160- True about gender identity disorder...

A-Difficult to treat.

B-More common in west civilization

ANSWER: A

161- Risk for bipolar mother having bipolar child...

20% (according to Medscape 15-25%)

options were.

10,

30, and higher

162- Sign of alcohol dependence...

A-Liver enlargement

B-Vitamin B6 deficiency

ANSWER: A

163- Associated with anorexia

A-Anxiety

B-Weakness

ANSWER: A

164- Increased suicide attempt seriousness in?

- A. Being female (no, being male has a higher risk)
- B. Being married (no, it DECREASES the risk of serious attempt)
- C. Previous attempts (correct answer as stated by Dr Laith Abbadi)
- D. Being depressed

165- Sign of organic underlying cause for psychosis...

Upper limb paresis.

166- CBT is ineffective in:

Paranoid Schizophrenia

(as checked by Dr Laith Abbadi)

167- Abnormalities in which system is best associated with depression?

Monoamine System

168- Associated with anorexia nervosa:

- A. Anxiety**
- B. Weakness**
- C. Normal body image**
- D. Low blood pressure**
- E. Body weight 20% above normal**

Answer: a

169- cause agranulocytosis:

clozapine

170- Dysmorphophobia, one is true:

seeks surgery

171- unlikely to happen in eating disorder:

hyperkalemia

172- considered hallmark in Alzheimer:

amyloid plaques

173- not an indicator for true hallucination:

Voices inside the head

174- unlikely in paranoid type of schizophrenia:

waxy flexibility

175- occur in conversion disorder:

unconscious anxiety

176- true about agoraphobia:

comorbid major depression

177- true about bipolar:

peak of onset in late adolescent and early adulthood

178- true about oppositional defiant disorder:

seeking revenge

179- true about Asperger:

normal cognitive development

180- shared side effect between TCA and SSRI:

sexual dysfunction

181- unlikely to cause hyperprolactinemia:

alprazolam

182- good predictor for schizophrenia:

previous history of mood disorder

183- physical feature of BDZ dependence:

tremor

184- carries highest suicidal risk:

a) bipolar

b) depression

Answer is A

185- true about panic disorder:

anticipatory anxiety

186- true about tardive dyskinesia:

incurable

187- true about homosexuality:

feature of sexual orientation

188- untrue about cognitive behavioral therapy:

exploration of unconsciousness

189- cognitive test used in dementia:

mini mental state examination

190- not a cocaine withdrawal symptom:

elation

191- false about depression in the elderly:

lower suicidal rate

192- not a risk factor for suicide:

childless marriage

193- one of these is a paraphylia:

fitishism.

194- one of these drugs is lethal in overdose:

amitriptyline

195- a male seeing snakes crawling on the wall, one of these is true:

an optimal dose of risperidone is appropriate treatment.

196- false regarding schizophrenia:

females have an earlier onset of the dis than males

197- one of these is an indication of clonazipine:

persistent negative symptoms after being treated for 6 weeks with 3 antipsychotics at optimal dose.

199- least likely diagnosis in a 16 yr. old child with ADHD:

antisocial personality disorder

200-. to dx bipolar disorder you need symptoms for:

2 weeks.

201- factitious disorder:

unconscious of the motivation

202- true about autism:

poorly developed non-verbal social communication

203- false regarding anorexia nervosa and bulimia nervosa:

bulimia has an earlier onset

204- treatment of specific phobia:

flooding

205- contraindication for ECT:

brain tumor

206- true regarding paranoid delusional disorder:

preserved social life and function

207-Least fatal in OD:

Correct answer: alprazolam

208- Choose wrong answer:

anticonvulsant drugs used routinely in management of alcohol withdrawal

209- Cognitive behavioral therapy is least effective for:

Answer: antisocial personality disorder (ASP) I chose agoraphobia.

210- NT least incriminated in depression:

- a) GABA
- b) NE
- c) Ach
- d) DA

Answer is C

211- Wrong answer:

less than 1/3 of children are dry at age 5 (Q about enuresis) Typically, most children are bowel and bladder trained by age 3 years.

212- True about OCD:

Compulsions must be preceded by intrusive thoughts obsessions can be without compulsions, but compulsions can't be without obsessions.

213- Alzheimer:

higher prevalence in > 80 y old

214- trichotillomania:

impulse control disses

215- wrong:

eating dis/anorexia more prevalent in lower economic class

216- Autonomic arousal/sympathetic overactivity present in all except:

- a) conversion disorder
- b) GAD
- c) PTSD

Answer is A

217- exposure and response prevention Rx of:

OCD

218- 3 episodes of depression: Tx should continue for how long?

answer: for life

(Dr explained: 1 depressive episode: Rx for 1 y; 2nd episode: for 2 y; 3 or more episodes: for life)

219- Most effective Rx of panic dis:

fluoxetine

220- Bad dreams least likely with:

mania

221- Thought disorder in depression:

negative thoughts

222- wrong about manic depression:

minimal genetic role

223- Ass with metabolic syndrome:

clozapine (other options were not antipsychotics)

224- true about conduct disorder:

predisposes to antisocial personality disorder in adulthood

225- True about PTSD:

startle response

226-True about GAD:

stress for no sufficient reason

227- Which of the following most likely to cause psychosis?

- a) Cocaine
- b) Cannabis

Answer is a

228- Which of the following is an effect of the drugs causing addiction?

- a) increase serotonin.
- b) decrease noradrenaline.
- c) causing tolerance
- d) decrease dopamine.

Answer is c

229- Which of these is true about panic disorder?

- a) diagnosed from single episode.
- b) occurs in females more than males
- c) they will not benefit from cognitive therapy.

Answer is b

230- Which of these is not true about personality disorders?

Patients with personality disorders usually have low IQ***

231- Which of the following is a feature of NON-REM?

It comprises 75% of the sleep cycle ***

232- Which of the following alcohol blood levels will cause abnormal behavior?

- a) 20 mg
- b) 40 mg
- c) 50 mg
- d) 100 mg
- e) 200 mg

Answer is E

233- Which of the following increase the risk of suicide?

- a) being female
- b) being physician

234- Which of the following drugs is anti-depressant?

- a) Alprazolam
- b) citalopram

Answer is B

235- Which of the following is not a part of mental examination?

- a) speech
- b) mood
- c) neurological examination
- d) memory
- e) judgment

Answer is c

236- Which of the following defines hallucinations?

- a) perception without an external stimulus
- b) An image presented to consciousness.
- c) perceived things in a different way than normal
- d) misinterpretation of external stimulus

Answer is a

237- Which of the following statements is true about schizophrenia?

- a) mostly occurs in the middle age.
- b) genetic is the most common etiology

Answer is b

238- All of the following indicate seriousness of suicide except?

- a) previous attempt
- b) being married

Answer is b

239- Which of the following drugs may cause addiction?

Alprazolam ***

240- The definition of Stupor?

Conscious but immobile ***

241- Hypomania is a disorder of?

- a) cognition
- b) memory
- c) mood

Answer is C

242- Risk of suicide in depression?

- a) 5%
- b) 10%
- c) 15%
- d) 20%
- e) 25%

Answer is b

243- Which of the following is a common lithium side effect?

- a) Nausea
- b) polyurea

Answer is b

244- Which of the following indicates that there is an organic disease?

altered level of consciousness ***

245- Underactivity of Ach will cause?

- a) schizophrenia
- b) anxiety
- c) dementia

Answer is c

246- Which of the following statements is true about depression?

- a) It is a leading cause of disability in community
- b) 35% of general populations have depression.
- c) females are four time to be affected than males.

Answer is a

247- Which of the following drugs is anti-psychotic?

risperidone ***

248- Which of the following is a negative symptom?

- a) hallucinations
- b) social withdrawal
- c) delusion
- d) passivity phenomena

Answer is b

249- Which of the following drugs will treat extrapyramidal symptoms?

- a) benzhexol
- b) lithium carbonate

Answer is a

250- Which of the following statements is true about anxiety disorders?

- a) They will not benefit from cognitive therapy.

b) Anxiety disorders are risk factors of low achievement

Answer is b

251- Case (male experienced a panic attack then he became afraid of getting out from his home alone)

Agoraphobia ***

252- Generalized anxiety disorder?

Anxiety about everyday issues ***

253- Social phobia is which of the following?

- a) phobia from crowded places
- b) phobia from negative evaluation

Answer is B

254- overactivity of dopamine will cause?

- a) schizophrenia
- b) depression

Answer is a

255- Which of the following is a good prognostic factor of schizophrenia?

- a) insidious onset
- b) family history
- c) precipitating factors ***
- d) negative symptoms

Answer is c

256- Which of the following will cause irreversible dementia?

- a) brain tumor dementia
- b) arteriosclerotic dementia ***
- c) hypothyroidism dementia

Answer is b

257- Which of the following occurs in dementia?

- A. Fluctuation in consciousness is a primary mechanism
- B. Hallucinations and delusions are prominent symptoms
- C. The onset is usually acute
- D. All cases are untreatable
- E. Amnesia for names are experienced early in the course of the disease

ANSWER: A

258- In people over the age of 65, one of the following is True:

- A. Parasuicide is more common than suicide
- B. About 20 percent have dementia

- C. Severe memory loss is common
- D. Anxiety disorders are more common than depressive disorders
- E. Any grade of amnesia indicates Alzheimer disease

ANSWER B

259- Which of the following is True of adjustment disorder?

- A. Is a response to a serious unexpected traumatic event
- B. The symptoms usually last more than six months
- C. Psychosocial performance is unaffected
- D. Conduct symptoms are the frequent presentation in adolescents with this disorder
- E. Grief is an disorder

ANSWER A

260-Which of the following is True of Impulse Control Disorder?

- A. Fugue can be a presenting feature.
- B. May present with trichotillomania.
- C. May present with unexplained physical symptoms.
- D. Includes malingering.
- E. Is associated with experiencing depersonalization.

Answer is B

261-Which of the following is a characteristic feature of Post-Traumatic Stress Disorder?

- A. Involvement in conversations related to the trauma.
- B. Recurrent distressing dreams
- C. Frequently visiting the place where the trauma occurred.
- D. Lowered arousal level
- E. The patient is always a survived victim of the trauma.

Answer is B

262. Desensitization is effective in the treatment of:

- A Specific phobia
- B. Social phobia
- C. Agoraphobia
- D. Obsessive compulsive disorder
- E. Conversion disorder

ANSWER is A

263. Which of the following medications would be the most appropriate to prescribe for a patient with Bipolar Depression?

- A. Haloperidol
- B. Bromazepam
- C. Valproic acid
- D. Fluoxetine
- E. Risperidone

Answer is C

264. Acute drug induced dystonia can be due to the use of:

- A. Procyclidine
- B. Alprazolam
- C. Propranolol
- D. Olanzapine
- E. Haloperidol

Answer is E

265. Which of the following is a REM sleep disorder?

- A. Nightmare
- B. Sleep walking
- C. Sleep talking
- D. Jet lag
- E. Enuresis

Answer is A

266. Dryness of the mouth is a recognized adverse effect of one of

- A. Fluoxetine
- B. Imipramine
- C. Diazepam
- D. Velafaxine
- E. Olanzapine

Answer is E

267. Which of the following is true of treatment with lithium?

- A. Lithium is the treatment of choice in schizophrenia.
- B. On long term use causes hyperthyroidism
- C. Use associated with marked anticholinergic adverse effects.
- D. Useful in the prophylactic treatment of bipolar
- E. Safe to use in pregnant patient.

Answer is D

268. Which of the following statements concerning behavior therapy is true?

- A. Behavior therapy is more effective than SSRIs in the treatment of depressive disorder.
- B. Includes thought stopping technique in OCD.
- C. Less effective than benzodiazepines in the treatment of agoraphobia
- D. Based on the exploration of the unconscious.
- E. Is a form of talking therapy.

Answer is E

269. Which of the following is true of autistic disorder?

- A. Basically, it is a disorder of intelligence.
- B. Distractibility and short attention span are pathognomonic diagnostic features.
- C. Onset is often before the age of 3.
- D. Is a form of schizophrenia of childhood.
- E. Response to antipsychotic medications

Answer is C

270. Which of the following is true of bipolar disorder (manic type)?

- A. Affects young girls more than men.

- B. At least two weeks of symptoms required for the diagnosis.
- C. Manic episode always immediately followed by a depressive episode.
- D. Usually associated with third-person auditory hallucinations.
- E. Mood stabilizers are preferred over antipsychotics in the long-term treatment.

Answer is E

271. Which of the following drugs is most useful in the treatment of ADHD?

- A. Haloperidol
- B. Fluoxetine
- C. Diazepam
- D. Methyl phenidate
- E. Riperadon

Answer is D

272. Which of the following symptoms is the most diagnostic of schizophrenia?

- A-Affective flattening
- B-Persecutory ideas
- C-Overvalued ideas
- D Primary delusion
- E. Grandiose delusion

Answer is D

273. Which of the following medications is most useful in the treatment of a patient with major depressive episode?

- A-Chlorpromazine
- B Fluoxetine.
- C. Carbamazepine
- D-Olanzapine
- E-Risperidone

Answer is B

274. Which of the following is true of childhood autism?

- A. Is associated with conduct disorder in childhood.
- B. Autistic features appear after the age of 3 years.
- C. Equally prevalent in male and female children
- D. Can be effectively treated by atypical antipsychotics.
- E. Social and communication skills are abnormally developed.

Answer is E

275. Dissociative disorder includes one of the following:

- A. Acute paraplegia
- B. Fugue
- C. Dymorphophobia
- D. Hypochondriasis
- E. Dysthymia

Answer is B

276. Which of the following is an effective medication in the management of panic disorder?

- A. Risperidone
- B. Haloperidol
- C. Fluoxetine
- D. Sodium valproate
- E. Clozapine

Answer is C

277. Which of the following is a diagnostic feature of Somatization disorder?

- A. Weight loss of 25% below expected body mass.
- B. Increased libido
- C. Preoccupation with physical appearance
- D. Multiple physical complaints without organic pathology for more than 2 years
- E. Repeated investigations with normal results reassure the patient.

Answer is D

278. In the management of major depressive episode one of the following statements is true:

- A. In severe depression SSRI's give more rapid therapeutic effect than ECT.
- B. Lithium is superior to TCA agents in treatment of bipolar depression.
- C. Prolonged regular use of benzodiazepines is considered safe.
- D. In the presence of ischemic heart disease, it is safe to prescribe TCA agents.
- E. ECT is contraindicated if the patient is an elderly.

Answer is B

279. Which of the following is true of ADHD?

- A. Characterized by hyperactivity in one setting.
- B. Distractibility and short attention span are prominent features.
- C. Methylphenidate can be instituted at age of 4 years.
- D. Never seen in adults.
- E. Benzodiazepine drugs are effective.

Answer is B

280. Which of the following medications may cause hypothyroidism?

- A. Lithium carbonate
- B. Haloperidol
- C. Valproate
- D. Benzhexol
- E. Methylphenidate

Answer is A

281. Hallucinations are unlikely to be experienced in one of the following conditions:

- A. Schizoaffective disorder
- B. Bipolar disorder
- C. Major depressive episode
- D. Delusional disorder
- E. Substance use disorder.

Answer is d

282-A patient presented to the clinic with acute drug induced dystonia, which of the following medications is most likely to help?

- A. Procyclidine

- B. Cholordiceoxide
- C. Propranolol
- D. Olanzapine-
- E. Sertraline

Answer is a

283- Which of the following symptoms indicate alcohol dependency?

- A. Morning shakes
- B. Morning hangover
- C. Maming dyspepsia
- D. Morning headache
- E. Morning blackouts

Answer is B

284. Which of the following conditions is associated with short REM sleep latency?

- A Generalized anxiety disorder.
- B. Obsessive compulsive disorder
- C.Narcolepsy depression sleep dep
- D. Schizophrenia
- E. Mania

Answer is C

285. Which of the following is a benzodiazepine?

- A. Citalopram
- B. Alprazolam
- C.Escitalopram
- D.Gabapentin
- E. Disulfiram

Answer is B

286.All the following regarding cannabis are true, EXCEPT:

- A. Tetrahydrocannabinol is the active substance.
- B. Cannabis smoke contains the same carcinogens as tobacco.
- C. May be detectable in the urine up to 4 weeks after use.
- D. It is a liquid-soluble substance.
- E. It belongs to the opioids class of drugs.

Answer is E

287.Which of the following is true about premenstrual dysphoric disorder?

- A. Symptoms occur between ovulation and menstruation.
- B. Symptoms occur at any phase of menstrual cycle.
- C. Considered normal when occurs in girls below 18 years of age.
- D. Has a weak association with depression
- E. Occurs in less than 20% of women.

Answer is A

288. Which of the following is unlikely to be associated with depression?

- A. Hypothyroidism
- B. Addison's disease
- C. Pheochromocytoma
- D. Pellagra
- E. Cushing's disease:

Answer is C

289. Which of the following drugs may cause depression?

- A. Lithium carbonate
- B. Imipramine.
- C. Haloperidol
- D. Fluoxetine.
- E. Valproate

Answer is C

290. Which of the following is more diagnostic of schizophrenia?

- A. Persecutory delusions
- B. Obsessional ruminations
- C. Command hallucinations
- D. Blunt effect
- E. Pressure of speech

Answer is A

291. Which of the following is a good prognostic sign in schizophrenia?

- A. Family history of schizophrenia
- B. Acute onset of illness
- C. Poor affective response
- D. High expressed emotion family environment
- E. Onset before the age of 18 years

Answer is B

292. All the following are correct regarding schizophrenia, EXCEPT:

- A. Both schizophrenia and affective symptoms are present at the same time.
- B. The prognosis is usually better than that of bipolar.
- C. Younger people tend to have associated mania while older people have depressive. symptoms
- D. History of schizophrenia occurs in excess of schizophrenia in their relatives.
- E. Treatment consists of antipsychotics and mood stabilizers.

Answer is B

293. Which of the following is true regarding puerperal psychosis?

- A. Relapses are usually absent.
- B. Usually resistant to treatment
- C. Usually of acute onset
- D. Response to ECT is poor.
- E. More common with last born baby.

Answer is C

294. All the following are true regarding Down syndrome, EXCEPT:

- A. Is the commonest cause of severe learning disability.
- B. The majority of affected patients have trisomy 21.
- C. Patients suffer a wide range of physical abnormalities.
- D Patients have normal fertility.
- E. Risk to mothers having a baby with Down syndrome increases with age.

Answer is D

295. All the following are correct regarding anorexia nervosa, EXCEPT:

- A. Low level of thyroid hormones
- B. Usually develops leukocytosis.
- C. Disturbance of the way in which the body is perceived.
- D. Occurs mainly in young women.
- E. Depression is common.

Answer is B

296. All the following are somatic symptoms of anxiety, EXCEPT:

- A. Palpitations
- B. Hyperventilation
- C. Depersonalization
- D. Urinary frequency
- E. Nausea

Answer is D

297. All the following point to good practice in using benzodiazepines, EXCEPT:

- A. Short term use
- B. Lowest effective dose
- C. Use large dose in primary insomnia
- D. Use to deal with specific problems.
- E. Intermittent doses

Answer is C

298. Which of the following disorders is characterized by impaired reality testing?

- A. OCD
- B. Delusional disorder
- C. Dissociative disorder
- D. Somatization disorder
- E. Impulsive control disorder

Answer is B

299. All the following occur in bulimia nervosa, EXCEPT:

- A. Parotid gland enlargement
- B. Disordered body image
- C. Family conflict

- D. Dental erosion
- E. Body weight less than 90% of normal

Answer is E

300. Features of depression include any of the following, EXCEPT:

- A. Fatigue
- B. Lack of interest
- C. Psychomotor retardation
- D. Mood incongruent hallucinations
- E. Anhedonia

Answer is D

301. All of the following are true of agoraphobia, EXCEPT

- A. Occurs more in females than males.
- B. Affects children more than adults.
- C. May be associated with panic symptoms.
- D. Better treated by flooding than desensitization.
- E. Behavioral therapy is better than drug therapy.

Answer is B

302. Supportive psychotherapy involves all the following, EXCEPT:

- A. Listening to the patient
- B. Giving guidance to the patient Analytic.
- C. Exploration of the unconscious conflicts
- D. Can be practiced by doctors in all specialties.
- E. Useful for patients with mental and physical disorders

Answer is C

303. All of the following are true of schizophrenia, EXCEPT:

- A. Long term administration of antipsychotic medications is mandatory.
- B. Living in an environment with high expressed emotions results in poor outcome.
- C. Genetic factors play a role in causation.
- D. Negative symptoms respond equally well to typical and atypical antipsychotics.
- E. Presence of schizoid premorbid personality predicts poor prognosis.

Answer is D

304. OCD is characterized by:

- A. Thoughts that are inserted by external agencies.
- B. Thoughts that are usually can be easily resisted.
- C. Thoughts that are intrusive and considered by the patient as alien.
- D. Thoughts that are meaningful.
- E. Thoughts that induce pleasure

Answer is C

305. Labile affect is:

- A. A disorder of formal thought disorder

- B. Means the patient laughs a minute and cries the next for no obvious reason.
- C. A bipolar disorder syndrome
- D. A symptom of dysthymia
- E. A term which is synonymous with anhedonia

Answer is B

306. Which of the following is a convenient therapeutic approach for individuals with antisocial personality disorder?

- A. Cognitive behavioral therapy
- B. Therapeutic community
- C. ECT
- D. Psychodynamic psychotherapy
- E. Antipsychotic medication

Answer is B

307. Which of the following is a positive schizophrenic feature?

- A. Ambivalence
- B. Blunted affect
- C. Catatonic symptoms
- D. Command hallucination
- E. Ideas of reference

Answer is D

308. Which of the following occurs in bulimia nervosa?

- A. Body mass index reduction of more than 15% of normal
- B. Distorted body image
- C. Lack of appetite
- D. Dieting
- E. Amenorrhea

Answer is B

309. Which of the following medications is effective in the treatment of schizophrenia?

- A. Imipramine
- B. Fluoxetine
- C. Risperidone
- D. Lithium carbonate
- E. Valproate

Answer is C

310. Which of the following is true of factitious disorder?

- A. Conversion symptoms are common.
- B. The patient is unconscious of the reason for producing the symptom.
- C. The patient is considered a malingerer.
- D. The patient usually undergoes multiple surgical procedures.
- E. Munchausen syndrome is an example of this disorder.

Answer is E

311. Which of the following differentiates delirium from other psychotic disorder

- A. Ideas of reference
- B. Overvalued ideas
- C. Voices of neighbors heard both by the patient and others in his voice.
- D. Visual hallucinations
- E. Clouded consciousness

Answer is E

312. All the following are recognized therapeutic approaches in psychiatry, EXCEPT:

- A. Cognitive behavioral therapy
- B. Interpersonal therapy
- C. Academic education
- D. Faith healing
- E. Pharmacotherapy

Answer is D

313. Regarding the etiology of mental disorders, one of the following is true:

- A. Migration
- B Dietary regulation
- C. Marriage
- D. Wealth
- E. Long employment

Answer is A

314. Completed suicide is more likely to occur in:

- A. middle-aged men
- B. young age women
- C. adolescents of both sexes
- D. Patients with dysthymia
- E. Hysterical personality disorder

Answer is A

315. Which of the following is an impulse control disorder?

- A. Erotomania
- B. Dysmorphophobia
- C. Trichotillomania
- D. Depersonalization
- E. Munchausen syndrome

Answer is C

316. One of the following is true of ADHD:}

- A. onset before nine years old
- B. fifty percent co morbidity with autism
- C. Male to female ratio is 1 to 3.
- D. Short attention span is essential for the diagnosis.
- E. Only 5% have conduct disorder feature.

Answer is A

317. All the following features are true childhood autism, EXCEPT:

- A. Qualitative impairment in social interaction
- B. Insistence in repeating the same.
- C. significant delay in language development
- D. Up to 5% develop epilepsy.
- E. Intelligence can be normal.

Answer is D

318. Which of the following is a conversion symptom?

- A. Depressed mood
- B. Fugue
- C. Aphonia
- D. Panic attack
- E. Depersonalization

Answer is C

319. Which of the following is an example of third-person hallucination?

- A. A voice inside the head saying to the patient "you are useless."
- B. A voice giving orders to the patient not heard by others close to him.
- C. Voices of neighbors heard both by the patient and others in his vicinity.
- D. A voice commenting on the patient's actions.
- E. Voices of people conversating and referring to the patient

Answer is E

320. Which of the following is a feature of cocaine dependence?

- A. Sedation
- B. Hypervigilance
- C. Reduced perceptual sensitivity.
- D. Pinpoint pupils
- E. Hypoacusis

Answer is B

321. Which of the following is the drug of choice in treatment of unipolar depression?

- A. Haloperidol
- B. Bromazepam
- C. Beta blockers
- D. Citalopram
- E. Lithium carbonate

Answer is D

322. Which of the following with regard to alcohol withdrawal features is true?

- A. Delirium tremens is expected to occur 72 hours after the last drink.
- B. Alcohol is advised as a best action to abort withdrawal symptoms.
- C. They respond dramatically to anticonvulsant medications.
- D. Memory blackouts indicate alcohol dependence.
- E. Auditory hallucinations are predominant withdrawal feature.

Answer is A

323. Which of the following is true of bipolar disorder?

- A. Thought echo is common.
- B. Overvalued ideas are characteristic.
- C. Anhedonia is frequently complained of
- D. Pressure of speech is remarkable.
- E. Command hallucination are frequent.

Answer is D

324. which of the following psychotropic medications is likely to be fatal in overdose?

- A. imipramine
- B. Fluoxetine
- C Alprazolam
- D-Fluvoxamine
- E-Olanzapine

Answer is A

325. Panic attacks occur in all the following conditions, EXCEPT:

- A-Substance withdrawal
- B. Lithium toxicity
- C- Phaeochromocytoma
- D-Hyperparathyroidism
- E-stress disorders

Answer is E

326. Which of the following is a dynamic psychotherapy term?

- A. Desensitization
- B. Reinforcement
- C. Free association
- D. Exposure
- E. Response prevention

Answer is C

327. One of the following does not differentiate grief from depression:

- A. Severe suicidal ideas
- B. prominent delusion of guilt
- C. Response to antidepressant therapy
- D. sadness
- E. Anhedonia

Answer is D

328. Erectile dysfunction is caused by which one of the following?

- A. SSRIs

- B. Sildenafil
- C-Mania
- D-Testosterone
- E-Yohimbine

Answer is A

329-Which of the following statements is true about anorexia nervosa?

- A. Behavior that targets weight control
- B. Dieting that resulted in 20% body weight loss
- C. Depressed mood resulting from loss of weight.
- D. Use of appetizers to fight anorexia.
- E. Frequent psychiatric consultations

Answer is A

330. Which of the following statements is true about bulimia nervosa?

- A-The peak incidence occurs in boys between 15 and 19 years of age.
- B Dental caries is a consequence
- C-Constipation is a common feature.
- D-Increased prevalence in higher socioeconomic class
- E-Body mass index is below 17.5.

Answer is D

331. Which of the following statements is true regarding anxiety disorders?

- A-The fear is controllable.
- B-The fear can be reasoned away.
- C- Affects men more than women.
- D-Autonomic arousal is usually present.
- E-Libido is increased.

Answer is D

332.Which of the following statements is True of premature ejaculation?

- A. Response to behavior therapy is poor.
- B. May result from use of fluoxetine.
- C.May respond to squeeze technique.
- D. Is a form of Paraphilias.
- E. Is an adverse effect of SSRIs.

Answer is E

333. Which of the following statements is True of anorexia nervosa?

- A. The peak incidence occurs between 25 and 35 years of age.
- B. The female to male ratio is around 5:1.
- C. Diarrhea is a common feature.
- D. Affects only upper socioeconomic class.
- E. Body mass index is below 85%.

Answer is B

334. Which of the following is True of Childhood Autism?

- A. Social interaction improves by age 6.
- B. Delayed language development is a marked feature.
- C. I.Q. usually above 70.
- D. Seizures affect about 75% of affected children.
- E. Predominantly, is a disorder of male children.

Answer is B

335. Which of the following is True of Attention Deficit Hyperactivity Disorder?

- A. Its prevalence in school-age children is in excess of 30%
- B. All sufferers are free of the Disorder at age 25.
- C. Medication is the most effective treatment.
- D. The major part in its etiology is a dominant gene.
- E. All of the sufferers have specific learning disabilities (dyslexia)

Answer is C

336. Which of the following is true of Cognitive Behavior Therapy?

- A. Very effective in treating a patient with schizophrenia.
- B. Uses thought diaries to identify thinking distortions.
- C. Effective treatment in specific phobia
- D. Usually, a long-term treatment
- E. Is a form of dynamic psychotherapy.

Answer is B

337. Which of the followings is a characteristic positive symptom of schizophrenia?

- A. Persecutory delusions
- B. Second person auditory hallucinations
- C. Thought echo.
- D. Illusions
- E. Obsessional symptoms

Answer is C

338. which of the following factors increases the risk of suicide in depression:

- A. Female gender
- B. Married
- C. Old age
- D. Young girls
- E. Educational grade

Answer is C

*****. Which of the following statements regarding Hypochondriasis is True?**

- A. Hypochondriasis is a dissociative disorder.

- B. The patient presents with many physical symptoms related to more than one organ without a physical pathology.
- C. Is always a primary disorder.
- D. Is a preoccupation with disease that is more prevalent in middle aged people than other age groups.
- E. Affects females significantly more than males

Very old question ,hypochondriasis means illness anxiety disorder

339. Which of the following is True of anxiety symptoms?

- A. Anxiety is always pathological.
- B. Low level of anxiety improves performance.
- C. Anxiety affects males more than females.
- D. Conversion disorder is associated with high anxiety level.
- E. Anxiety is associated with lowered autonomic arousal.

Answer is B

340. Which of the following is True of phobic disorder?

- A. The fear is controllable.
- B. The fear is proportional to the need of the provoking stimulus.
- C. Response to anxiolytic medication is marked.
- D. Desensitization is preferred over flooding in agoraphobia
- E. Agoraphobia may follow a panic attack.

Answer is E

341. Which of the following is True of delirium?

- A. Nocturnal improvement from delirium is characteristic.
- B. Misidentification of known people often occurs.
- C. Intact attention
- D. Frequently associated with visual hallucinations in clear consciousness.
- E. Patient often recalls events experienced during delirium after recovery.

Answer is B

342. All the following are correct regarding acute stress disorder, EXCEPT:

- A. Recurrent dreams related to the event.
- B. Increased vigilance
- C. it affects only those who are subjected to the event.
- D. Avoidance of situations likely to trigger memories.
- E. Intrusive thoughts, feeling and perceptions related to the event.

Answer is C

343. a case of paracetamol toxicity

NAC

344. pt with hallucination all possible diagnosis except:

delusional disorder

345-pt with sudden cloudiness of consciousness, he was healthy before:

Delirium

346. chronic alcohol use man, treatment of his condition

a-clonidine

b-benzodiazepam

B is the answer

347. does not cause depression:

A. nifedipine

B. reserpine

Answer is A

348. Schizophrenic patient on medication, presented with weight gain, unilateral gynecomastia, cytopenia. all of the following may be the cause except:

A. fluoxetine

B. olanzapine

C. haloperidol

Answer is A

349. Visual hallucination is most specific of:

A. Schizophrenia

B. Delirium

Answer is B

350. Alcoholic patient presented with diplopia, inability to stand, decrease LOC, one day after treated with (something) the most likely cause is.

A. delirium

B. vit B deficiency

Answer is B

351. Not associated with sympathetic hyperarousal:

A. conversion disorders

B. delirium

Answer is A

352. Patient with anorexia nervosa may have all of the following except:

A. hyperkalemia

B. leukopenia

C. thrombocytosis

Answer is C

353. What do we use selective 5HT blockers for?

major depression

354. Which one is an SSR?

fluoxetine

355. Major depression patients, most common presentation is?

somatic symptoms.

356. Characteristic of schizophrenia?

auditory hallucinations

357. Paranoid delusion is a feature may be found in any of the following disorders, EXCEPT:

- A. Mania
- B. Psychotic depression
- C. Cognitive disorder
- D. Schizophrenia
- E. Impulse control disorder

Answer is E

358. Which of the following is true of panic disorder?
